

LIVE@Containerchain

An Introduction

Who is Containerchain?

Empty Container Depots

We provide every empty container depot in Australia with our operating system, which includes the well-known notification system that has operated nationally since 2011

Transport Operators

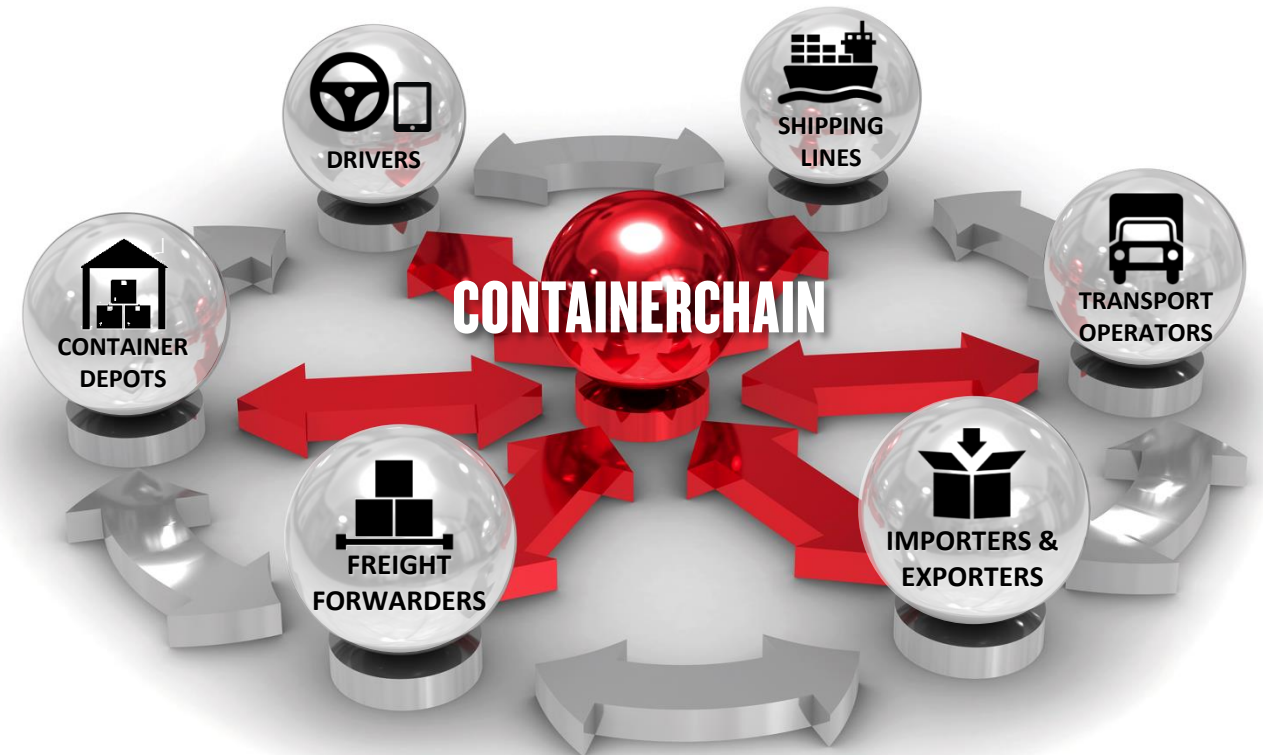

We provide transport management systems to the largest transport operators in Australia, with over 40% of the container transport volume in Australian ports moving via our systems.

Shipping Lines

We provide real-time visibility and communication tools to every shipping line in Australia.

Freight Forwarders/Importers/Exporters

Now our solutions have been extended to provide an unprecedented level of visibility to you, the end user.

What Problems Do Customers Face Today??

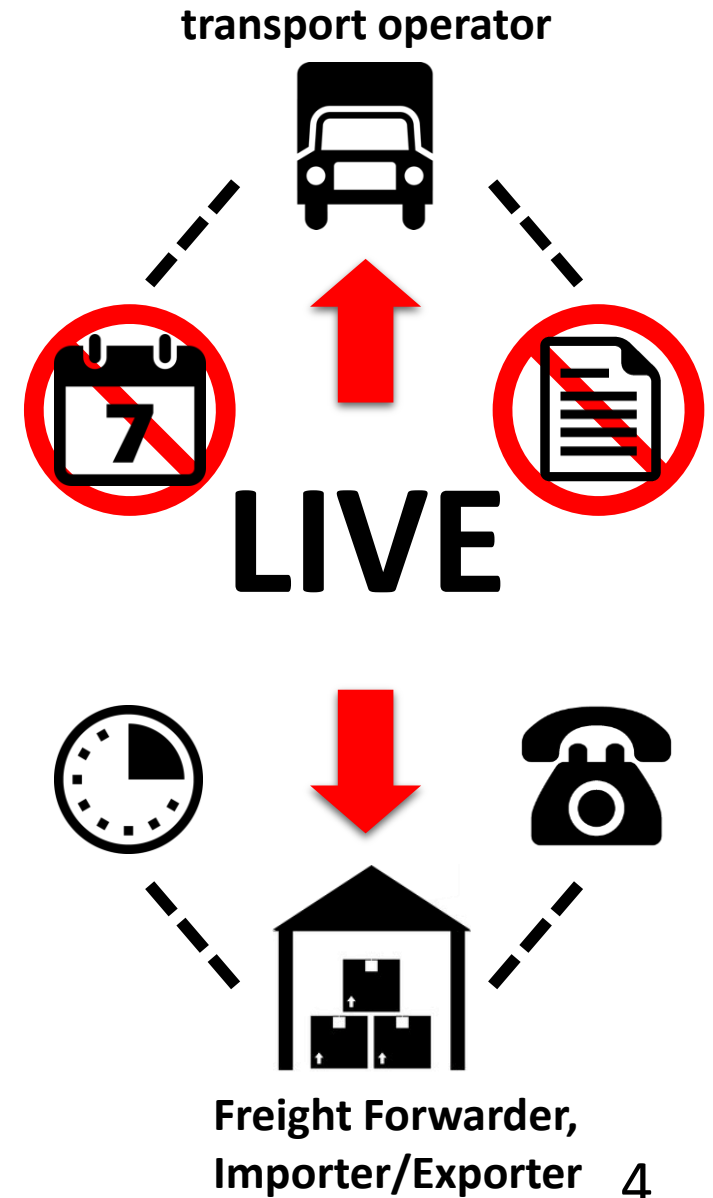

- Lack of timely, accurate information about their container movements
- Difficult to access all the data that they need
- Many manual processes to 'get the job done'
- Difficult to manage all of the various documents that each job needs
- Each transport company does things differently
- Demurrage tracking and management is difficult, and potentially costly
- Unexpected additional charges
- ALL OF THE ABOVE INCREASES COSTS

LIVE and It's Benefits to Customers

- A multi-carrier, multi-port visibility and communication web portal for freight forwarders, importers & exporters
- Links everyone in the supply chain to a central 'hub'
- Reduces costs directly by reducing headcount – the system does the hard work
- Reduces costs indirectly by minimising or eliminating existing inefficiencies
- Connects customer to trucks and forklifts in real-time
- No cost to the customer for access or use

What is LIVE?

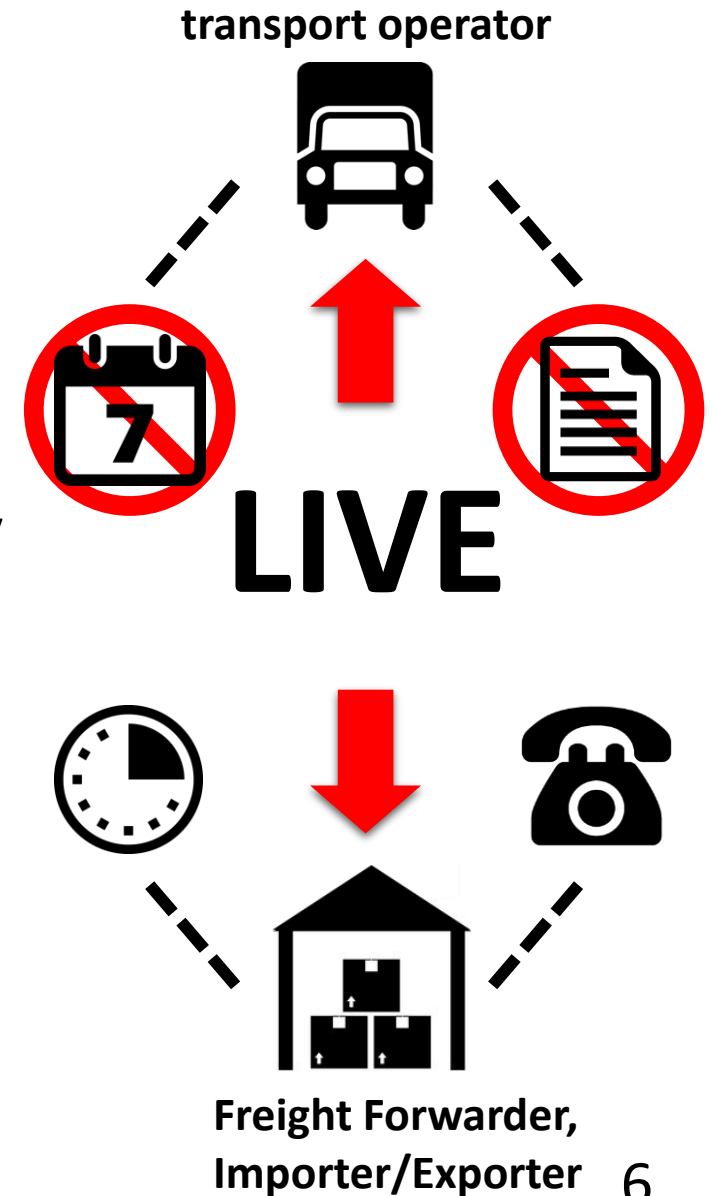

A new (and completely unique) solution to old problems faced by customers in the container logistics industry

What Features Does LIVE have ?

- Enables customers to book, manage, and monitor individual container movements with any 'LIVE-enabled' transport company in Australia
- Provides dashboards for identifying problems before they occur, as well as performance reports for managers
- Online document management – e.g. an uploaded document appears on the truck drivers screen in seconds
- Eliminates phone calls to service providers

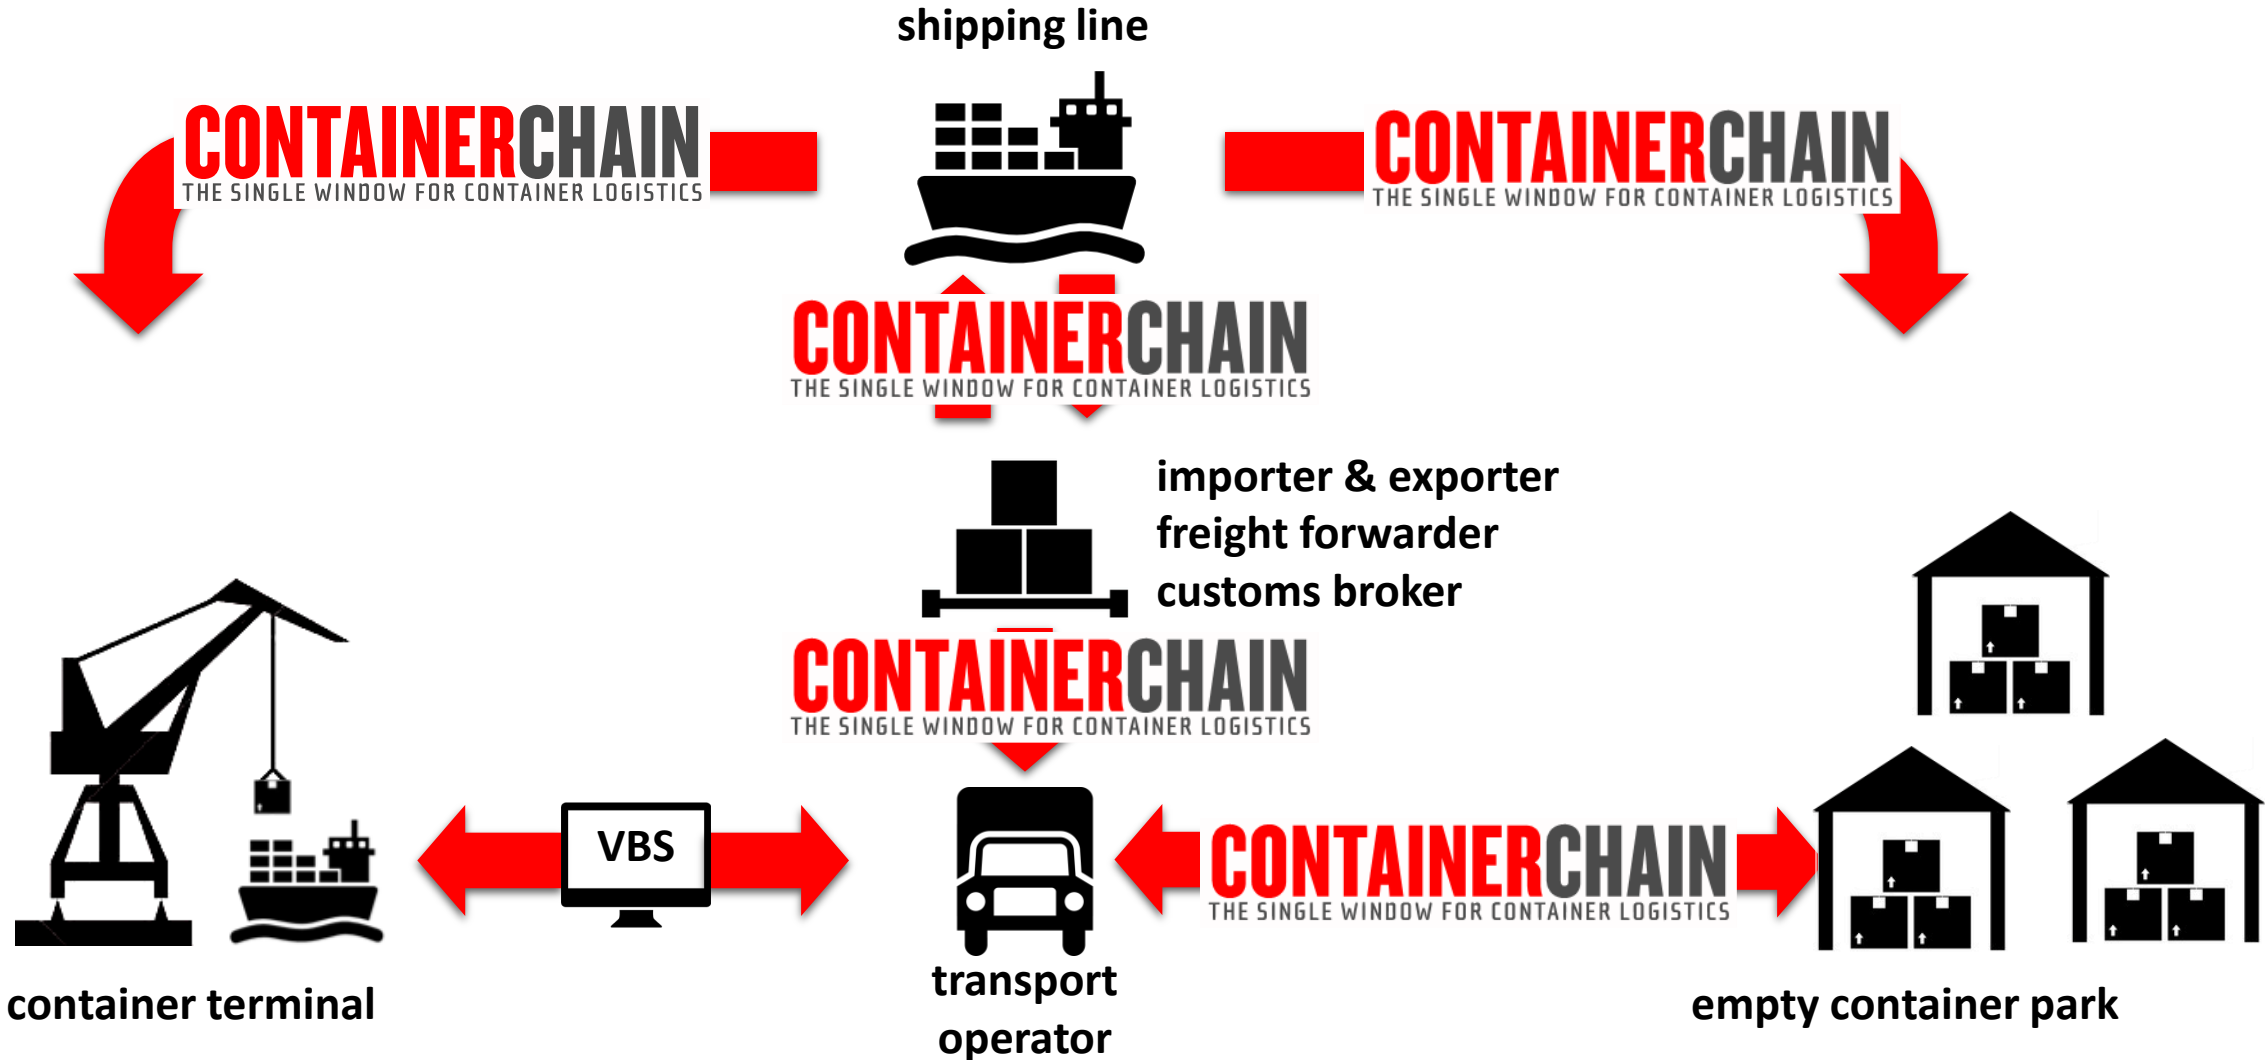

What Features Does LIVE have ?

- Links to the Containerchain notification system – customers have direct access through LIVE to dehire and pickup information, such as release information and dehire dates
- Links to the Containerchain TMS
- Allows customers to ‘invite’ a new transport company to partner with them in any port in Australia
- Easy to navigate and use

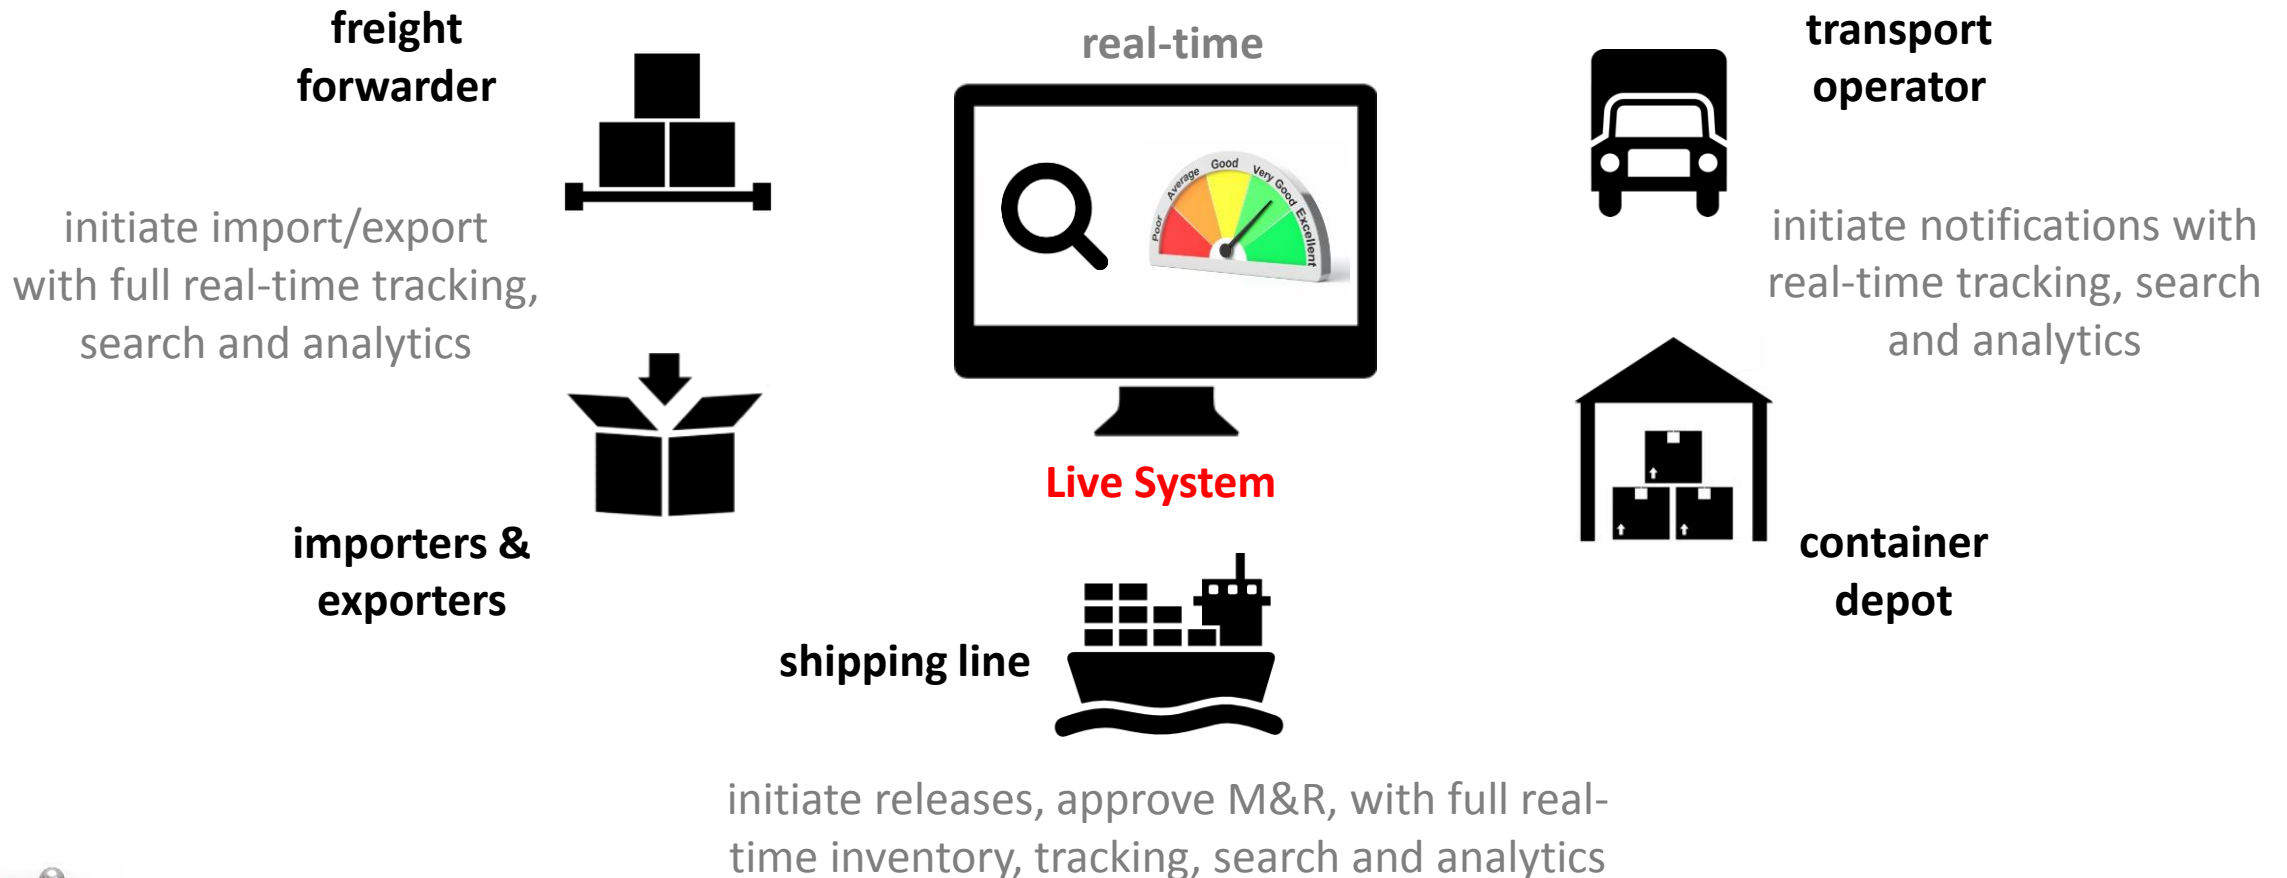

CONTAINERCHAIN
