

****Breaking News****

ACFS Port Logistics increases its accreditations in Adelaide (SA), and becomes the first provider in the state accredited to offer **Class 4.1 Heat Treatment** for Biosecurity risks in Adelaide.

Based at our facility at **4 Martin Avenue, Gillman, South Australia** (Depot Code: S1773) our latest accreditation will further boost the suite of services that we provide around Biosecurity Treatments, Tailgates, Inspections, Washes and all other Quarantine related services.

As part of our significant commitment to Biosecurity treatments and compliance, behind South Australia, and New South Wales (already accredited), this is the second stage of our strategic planning and we are already underway with other applications in Queensland, Victoria, and Western Australia! We will certainly provide ongoing updates as those applications progress to provide a national solution for Class 4.1 Heat Treatment.

What does this mean for our customers and our Industry?

Increasing capacity and volumes by approx. **66%** daily, and materially reducing waiting times for importers, and therefore costs.”

Based on that, when will the BACKLOG in South Australia clear?

We anticipate the backlog will be cleared by the end of February!

Will the 4.1 treatment option be an alternate treatment option to Methyl Bromide?

Absolutely

Who do I contact if I need more information?

Call Andrew Crawford (National) on 02 8484 6268 or 0414423 007 or your local contact Angelo Diraimondo – SA on 08 8193 7500 and we will assist in explaining this treatment option and all our associated services.
