

Loose Cargo Security Screening Checklist

To assist us in screening your cargo efficiently, please advise us if your cargo is:

- **Homogenous Cargo:** each box contains exactly the same item. Homogenous cargo may be palletized, provided the pallet does not exceed 1.53m x 1.22m x 1.22m.

OR

- **Non-Homogenous Cargo:** each box contains different items, or each box contains the same items made from different materials.

Please complete details below:

AWB No: _____

No. Pieces: _____

Please tick applicable boxes:

Homogenous:

Non-Homogenous:

Each Piece Labelled:

If you tell us your cargo is:

Homogenous

We will screen your cargo as a consolidated unit. However, if during the screening process our staff determine cargo is non-homogenous, we will need to confirm labelling and paperwork compliance before re-screening your cargo as per non-homogenous requirements below.

Additional screening charges may be incurred, and/or your cargo may be delayed or rejected by us if it isn't presented in accordance with the requirements above.

Non-Homogenous

We will screen each individual piece in the AWB. You will need to ensure each piece is separately labelled, that the labels bear the AWB no., and that paperwork shows the total number of pieces. Any Non-homogenous cargo that is not correctly labelled will be rejected.

Additional screening charges may be incurred, and/or your cargo may be delayed or rejected by us if it isn't presented in accordance with the requirements above.

Thank you for your assistance in helping us to process your cargo efficiently through the piece level security screening requirements for all outbound cargo.
