

30 September 2020

The Australian Department of Agriculture and Water Resources has issued new guidelines and instructions for the 2020/2021 high risk season (October 01, 2020 to April 30, 2021) to prevent brown marmorated stink bug infestations.

DPWLA has accordingly undertaken a review of its infrastructure and is pleased to offer increased capacity (100 TEU) & 24/7 capabilities this season, with a 48-hour KPI turnaround.

DPWLA is Port Botany's only fully integrated container Logistics Park. We guarantee the highest degree of security & an uncompromised reliable service. Majority of our personnel and contractors are DAWR 1.1 trained to ensure work is completed to the highest standard.

Portal:

In an industry first DPWLA is pleased to offer a live customer portal. This will bring the benefit of live status updates as containers move through the gate to being made available in ICS. This will provide instant clarity around container availability & in turn reduce additional communication via email / telephone etc.

Services

* Fumigation (Standard & BMSB). The option including transport from terminal to depot is also available, along with the ability to go straight from DPW vessel to fumigation pad in one move.

* Tailgate inspections (including rural) / AQIS Washes

* FCL Storage & Handling

Manned Depot:

DPWLA is now a manned depot with AQIS officer on site 3 days weeks – Mon; Wed and Fri

Time: 8 am to 12 pm

Pricing:

Please contact our Commercial team for a competitive quote.
