## REVISION TO NEW TERMINAL HANDLING FEES – EFFECTIVE 18<sup>th</sup> APRIL 2016

Over the last 14 days we have entered into consultations with a number of groups including selected Freight Forwarders and our Airline customers about the changes to our fees announced on 24th March

The outcome of these discussions is that we have decided to revise our export fees previously announced. These revisions will have the same effective date of the 18<sup>th</sup> of April as the original

We have decided to revert to the fee structure we had previously, with a separate build up fee for >3,500kg and >10,000kg and a terminal handling / security fee for all loose export kilograms.

While we regret a further amendment and the confusion it may cause, we have always committed to listen to feedback and adjust to the market conditions where needed, hence the change

We have had some feedback regarding the amended times for storage FOC as well. We are not attempting to restrict the ability for our customers to drop off / pick up cargo at times which suit them and which are consistent with the details of the flight, but rather are trying to ensure that our terminals retain enough space to ensure the efficient processing of cargo for all customers. Please speak with the appropriate Cargo Manager should you need to discuss specific circumstances or have any questions about the changes and how they affect your business.

We have also sought further professional clarifications in relation to the application of GST on exports and have amended the applicability of GST on some export items to match this advice.

If you have any queries regarding the attached, please do not hesitate to contact any of the following:
